

Choo Jun Sheng

• Software Engineering • Mobile Developer • Computer Science

Kuala Lumpur | 018-9868627 | junshengchoo57@gmail.com | [Github](#) | [LinkedIn](#) | [My Portfolio](#)

SKILL

Technical Skills: Java, Kotlin, Flutter, HTML/CSS, Java Script, Typescript, Bootstrap, Python, SQL, React.js, React Native

WORK EXPERIENCE

Cyber Village Sdn. Bhd. | Frontend Developer *Dec 2023 - Present*

- Participated in reengineering a bank application from Angular to React Native, leading the transition of 20+ key modules crucial to the application's core functionalities.
- Collaborated closely with a cross-functional team of 7 developers, UX/UI designers, and business analyst to ensure seamless integration and a consistent user experience across platforms.
- Utilized React Native alongside Redux for state management, and integrated third-party APIs for enhancing functionality.
- Regularly communicated progress and technical details to stakeholders, ensuring alignment with business objectives and gathering feedback to refine features in an agile development cycle.
- Developed new technology that reduced deployment time by 15%, and cut down coding effort by 25% for each modules.

Cyber Village Sdn. Bhd. | Web Developer Intern (Full Stack) *June 2023 - Nov 2023*

- Participated in a bank project by using some tools and framework such as Angular.js, Joget, Java Spring Boot, Stripe API, Linux, DBEaver and Gerrit.
- Contributed to developing 10+ new features in the software application within 6 months of internship period.

EDUCATION

Tunku Abdul Rahman University Management and Technology **Setapak, Kuala Lumpur**
Bachelor of Software Engineering (Honours) (CGPA: 3.37/4.00) *Oct 2020 - Dec 2023*

- Related Coursework: Web development, Software Architecture Design, Data Structures and Algorithms, Object-Oriented Programming, Database Management, Artificial Intelligence, Mobile Application Development.

PROJECT EXPERIENCE

**More Projects may refer my personal website: <https://junsheng-portfolio.vercel.app/>*

Carpooling System Driver Application (Final Year Project) *Feb 2023 - April 2023*

- Developed by using **Kotlin** for frontend, showcasing exceptional native mobile development skills and increased user engagement by 30%.
- Integrated with Firebase APIs as the project database for authentication, real-time data synchronization and data storage, and Google Maps API, Text Recognition (OCR) API.
